SUMMARY

Full-stack Software Engineer with experience in Java, Python, Golang, and React, focused on building scalable, data-intensive systems. Proven track record in developing and optimizing REST APIs, integrating secure role-based access with OAuth2 and JWT, and deploying cloud-native apps on AWS. Passionate about ETL workflows, real-time monitoring, and AI-driven data tools. Strong collaborator with cross-functional teams and adept at delivering high-performance solutions that reduce latency, improve reliability, and support seamless data transformation.

EXPERIENCE

CHit Aug 2024 – Apr 2025
Software Intern | Full Stack Developer **Python, React, Java, Spring Boot, AWS, SQL, RESTful API**

- Reduced REST API latency by 35% by optimizing Spring Boot configurations, accelerating response times for key workflows
- Integrated OAuth2 with AWS Cognito and JWT to enforce secure role-based access across 5+ user roles
- Improved form completion rates by 25% via dynamic React validation and real-time error feedback
- Boosted PostgreSQL query speeds by 40% through schema redesign and intelligent indexing
- Accelerated CI/CD delivery 3× by containerizing services with Docker and deploying on AWS ECS

Infosys May 2021 – Aug 2023
Software Engineer | Full Stack Developer **Java, Spring Boot, Golang, Python, AWS**

- Improved system observability by migrating 15M+ daily metrics to Amazon Managed Prometheus, cutting latency by 80%
- Automated Kubernetes pod lifecycle with custom Operators, reducing manual ops work by 70%
- Improved legacy app reliability by resolving memory/CPU issues and increasing unit test coverage by 37% using JUnit & Mockito
- Reduced production defects by 40% through proactive debugging and root cause triaging with senior engineers
- Built live dashboards with React integrated to AWS CloudWatch and Prometheus, surfacing logs, health checks, and KPIs

TECHNICAL SKILLS

- **Languages** Java, Python, Golang, SQL, JavaScript
- **Frameworks & Tools** Spring Boot, React, FastAPI, Hibernate, JUnit, Mockito
- **Cloud & DevOps** AWS (Lambda, ECS, EC2, S3, Prometheus), Docker, Kubernetes
- **Databases** PostgreSQL, MySQL, MongoDB, Neo4j
- **Concepts** ETL/ELT Workflows, REST APIs, OAuth2/JWT, CI/CD, JSON/XML Parsing, Cloud Infrastructure, Data Pipelines, RAG/LLMs

PROJECTS

Resume Builder Web Application May 2025 – Current
Resume automation tool for LaTeX-based PDF generation and profile management

- Built a React + FastAPI platform to streamline resume generation with clean UI and persistent session handling
- Secured user data via JWT-based auth with token validation and expiry workflows
- Generated LaTeX resumes dynamically using Jinja2 templates and XeLaTeX pipeline
- Enabled persistent user state via JSON APIs, improving repeated session engagement and 30% higher user retention

CampusHub – Role-Based Platform for Academic Institutions May 2024 – Aug 2024
Internal tool for students, faculty, and admin to manage academic workflows

- Developed backend services using Spring Boot and Hibernate for a multi-role academic portal
- Implemented secure role-based access using JWT for 5 user types (students, faculty, HODs, admins, registrars)
- Built workflows including assignment upload, class schedule viewing, and admin provisioning with React + FastAPI
- Deployed to AWS ECS with PostgreSQL backend for scalable, fault-tolerant architecture

EDUCATION

University of Maryland, Baltimore County May 2025 - Current
Master of Science in Data Science **GPA:4.0/4.0**
Courses:LLM (Transformers, RAG, Fine Tuning, Prompt Engineering), Big Data Processing, Machine Learning

RVR & JC College of Engineering, India Jul 2017 - Apr 2021
Bachelor of Technology in Electronics and Communication Engineering **GPA:9.08/10**

CERTIFICATIONS

- **Google Machine Learning Engineer**
Google June 2025 – No Expiry
